SKILLS

FRONTEND

TypeScript, JavaScript, React / Next.js, Vue / Nuxt, Tailwind CSS

BACKEND

Node.js, Golang

DATABASES

PostgreSQL, MySQL, MongoDB

DEVOPS & CLOUD

Docker, Kubernetes, Terraform, Ansible, Scaleway, AWS

AI

Claude, Cursor, Mastra

TOOLS

Git, GitHub

EDUCATION

2024 – 2026

Master's Degree in DevOps
Sup de Vinci · Apprenticeship

2023 – 2024

Bachelor's Degree in Software Development
Sup de Vinci · Apprenticeship

2021 – 2023

Foundation Programme
Sup de Vinci

CERTIFICATIONS

September 2026

AWS Certified Solutions Architect Associate
Amazon Web Services

LANGUAGES

French (native)
English (B2)

INTERESTS

Motorsport, rugby, football, motorcycling

Full Stack developer (TypeScript, React / Next.js, Vue / Nuxt, Node.js) with 3 years of experience in startup environments. I deliver features end to end, from development through to production, with a strong focus on code quality, security and performance.

PROFESSIONAL EXPERIENCE

Full Stack Developer · Cyna

January 2026 – October 2026 · Apprenticeship · Clichy

- Full stack development of the platform through which customers subscribe to the managed SOC.
- Support automation with AI agents (Mastra): ticket analysis, action selection, permission checks on the requester and reasoned escalation at the slightest doubt.
- Contributed to an in-house SOAR automating the handling of more than 90% of alerts.
- Wrote Cursor rules together with Claude skills and personas: higher accuracy of generated code and reduced token consumption.
- Set up an automatic purge of customers after 14 days without a subscription.

DevOps Engineer · Cyna

August 2024 – January 2026 · Apprenticeship · Clichy

- Deployment of internal tools with Docker and Kubernetes, with automated deployments.
- Ansible playbook coupled with a Terraform module for the secure, pre-configured provisioning of VMs on Scaleway.
- Prometheus exporter for real-time tracking of Scaleway and AWS usage.
- Monitoring and Slack alerting system for infrastructure and services.
- Internal automations built on n8n.

Web & Mobile Developer · JProject

May 2023 – July 2024 · Internship, then apprenticeship · Cergy

- Development of a website building platform (Nuxt.js / Django), then migration of the frontend to Next.js.
- Development of the companion mobile application in Flutter.
- Delivery of major features (checkout, customer receipt generation) with no regressions or bugs.
- Automated generation of tailored demo sites for prospects from CRM data.

PROJECTS

CI/CD Pipeline · DevOps academic project, Sup de Vinci · 2026

Design of a complete pipeline: automated tests, vulnerability scanning, image builds, IaC and Kubernetes deployment. Development of the deployed application.

E-commerce site · Sup de Vinci · 2024

E-commerce site with an administration interface, Golang backend and Next.js frontend.
